2. Citations and explanations:

Document cited in the International Search Report:

D1: EP0830034 A

From D1 an electronic equipment, which includes camera means for forming data on an object located in the imaging direction, in which case the said camera means include at least two camera units and data processing means, which are arranged to process the data formed by the camera means, according to the currently chosen imaging mode of the equipment, in order to form image information is known (refer to page 34, line 5-page 35, line 37; figures 3, 4, 21a, 46, 47, 55 and 56; claims 30, 33, 34 and 44 and abstract) in which equipment, the mutual position of the camera units relative to each other is arranged to be altered to correspond to the current imaging mode.

Consequently, the subject matter of claim 1 is previously known and therefore lacks novelty.

Since the present invention according to the independent claims 14 (system), 27 (method), 38 (program product) and 47 (camera module) does not encompass any technical features not present in claim 1, the analysis above concerning claim 1 is also applicable to these claims. Hence, the present invention according to claims 14, 27, 38 and 47 lacks novelty over D1, and is therefore not patentable.

Furthermore, the methods/systems referred to in claims 2-13,

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of: Box $\,V\,$.

15-26, 28-37, 39-46 and 48 are considered to lack an inventive step over D1, since what is defined in these claims is not considered to differ essentially from what is known from the cited document (D1). If it can be shown that some aspect covered by claims 2-13, 15-26, 28-37, 39-46 and 48 provides unexpected effects and the claims are restricted accordingly, the judgement may be reconsidered. Until these conditions are met, claims 2-13, 15-26, 28-37, 39-46 and 48 are not considered to involve an inventive step.

Consequently, the claimed invention according to claims 1, 14, 27, 38 and 47 lacks novelty over D1, whereas the claimed invention according to claims 2-13, 15-26, 28-37, 39-46 and 48 is novel, but not considered to involve an inventive step over the teachings of D1.

Further, the claimed invention according to claims 1-48 is industrially applicable.
